The project

To answer these problems and needs, it is foreseen:

- ✘ to develop the facilities multimedia in the local of teaching,
- ✘ to train the teachers to the production of didactic multimedia resources,
- ✘ to put a device for distance access to these resources and to some formations,
- ✘ to develop a technical support structure for the production and the exploitation of the ICT in Education.

Step for the insurance quality
of the medical teaching to the South Tunisian

Step for the insurance quality of the medical teaching to the South Tunisian

- ✘ To the faculty of Sfax, the theoretical formation observed, these last years, a considerable qualitative development : Educational formation of the teachers by multiple seminaries organized within the faculty, use of effective audiovisual means,...
- ✘ As for the practise formation, it benefited a lot from the improvement of the organization of the practicums by the creation of obligatory circuits guaranteeing the passage of the students by a big number of medical departments, with a total fluidity.

Step for the insurance quality of the medical teaching to the South Tunisian

- ✘ Also, we are called to bring the necessary corrective action to improve the quality of our medical teaching, taking advantage of the technological, computer and educational progress.
- ✘ Besides, the general context is in favour of this operation:
 - ✘ The regulatory authority is hired completely in a reflection of improvement of the medical formation of basis. Thus, the improvement of the expertises of the physicians formed will be able to give back to the general physician practitioner its place in the Tunisian health system and will be able to improve its picture within the society.
 - ✘ The reform in progress, of the health system, is a catalyst and a stimulant to go from the before in the reform.
 - ✘ A cooperation and an accompaniment with motivated foreign partners are in progress (TEMPUS Dem@tice)

Conclusion
